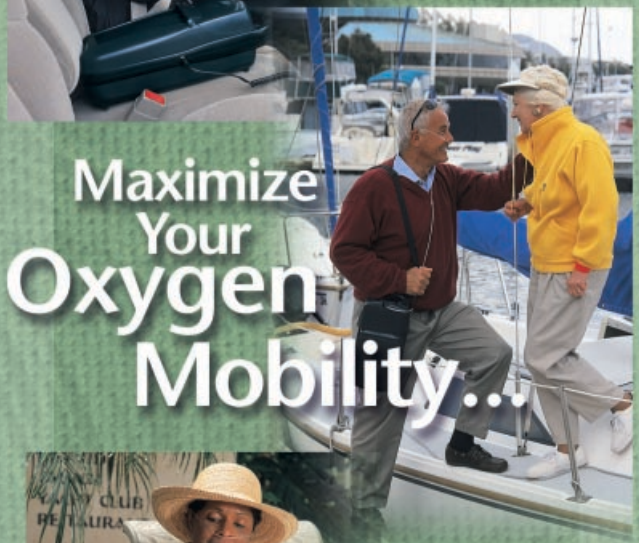
Endless LifeStyle Possibilities



Maximize Your Oxygen Mobility...

...Like Never Before

LIFESTYLE™ PORTABLE OXYGEN CONCENTRATOR

FOR ACTIVE, WORKING, AND TRAVELING OXYGEN PATIENTS

AIRSEP®

LifeStyle™ by AirSep®

Oxygen patients and their caregivers all over the world are now traveling lighter, further from home, and free of the restrictions formerly imposed by oxygen refills and deliveries.

Whether it's a trip to the market, an unplanned overnight or extended stay with relatives, or just out for coffee with a dear friend, no other oxygen system can meet your needs better or more conveniently than LifeStyle.

Portable Oxygen Solution

LifeStyle by AirSep is the consummate portable oxygen solution — a less than 10 lb. (4.4 kg) concentrator that actually makes oxygen everywhere you go. AirSep is a leading manufacturer of high-quality respiratory equipment for home, hospital, and clinical use.

If you are an active oxygen patient, you may have already experienced the limitations of needing to bring all of your contents with you, and still occasionally felt the anxiety of running out of oxygen due to circumstances beyond your control.

In contrast, you will feel liberated by LifeStyle's unique, exclusive oxygen producing capability, which is truly irreplaceable. This unique system enables you to return to work, join the family reunion, or travel on an exotic cruise to meet your heart's desire.

No Cylinders, No Refills – Ever Again!

Imagine – no need for cylinders or liquid system refills! That means no coordinating deliveries at home or away and no patiently awaiting a visit from the equipment provider to ensure your contents are filled so that you're ready to go — with LifeStyle you already are!

Multiple Power Options

Multiple power options mean you can be outdoors or just about anywhere indefinitely with simple battery recharges or replacements. The unit operates continuously and recharges the battery on normal household AC electric or from the 12-volt DC outlet available in most automobiles or motorized boats.

Thousands of patients around the globe now use the one-of-a-kind LifeStyle Portable Oxygen Concentrator to meet their daily supplemental oxygen needs. And LifeStyle is durable enough to use 24 hours a day.

Working patients, traveling patients, and those for whom the active lifestyle is vitally important rely on the safety, convenience, and versatility of the most modern and technologically advanced method of oxygen delivery.

SPECIFICATIONS

OXYGEN CONCENTRATION*:	1-5 pulse settings; equivalent to a continuous flow of 90% oxygen at ±3
DIMENSIONS:	5.5 in. H x 7.25 in. W x 16.31 in. L (13.9 cm H x 18.4 cm W x 41.4 cm L
WEIGHT:	9.75 lb (4.4 kg)
POWER:	LifeStyle unit — 13.5 VDC, 5.5 amps Power supply — 100-250 VAC, 50/60 Hz, 1.0 amps maximum Battery pack — 12 VDC, nominal
BATTERY DURATION:	50 minutes nominal for fully-charged battery
BATTERY QUICK-CHARGE:	2 to 2-1/2 hours
WARRANTY:	2-year parts on unit; 90 days on rechargeable battery

**Based on atmospheric pressure of 14.7 psia (101 kPa) at 70° F (21° C)*

Using efficient pulse-flow technology, LifeStyle delivers oxygen only on inspiration, thereby eliminating the wastefulness incurred by continuous flow systems. This advanced technology makes possible the most lightweight, compact, portable concentrator to accompany you anywhere opportunity takes you.

Light Weight and Ready for Adventure

The first truly portable oxygen concentrator of its kind — LifeStyle — has encouraged patients, loved ones, and other caregivers to do what they have not done in years, or to simply try something new, all with maximum mobility.

Easy to Operate

This easy-to-use unit allows you to be up and running in no time. Just flip open LifeStyle's cover, attach the end of your oxygen cannula to LifeStyle's oxygen outlet, turn the unit on to your prescribed setting, and you're all ready to go. What could be easier?

Alarm System

The unit's light indicator/alarm system shows that you are receiving a pulse flow on every breath with its intermittent green light display. The unit also illuminates with an intermittent yellow indicator and then audibly alarms to alert you when the battery is near depletion. The red indicator, which can be accompanied by an audible alarm as well, signals that the cannula may be inadvertently disconnected, there is a kink in the tubing, or no breathing is otherwise detected by the unit at that time — all valuable safety features.

A Custom-Made Cart for Added Convenience

A portable, retractable cart gives you even more convenience and flexibility. There's no need to carry the unit when out for a short stroll or when taking an extended walk. The cart also features a custom-rack system, planned to hold a multi-battery/charger, which will be available in 2004 through your provider, exclusively from AirSep as well.

The Perfect Accompaniment for Airport Logistics

LifeStyle eliminates the difficulties of air travel. Think about never again needing to plan airport deliveries of oxygen. Schedule and make your connections with LifeStyle instead, and there's no need to panic about unexpected delays or layovers ever again. LifeStyle's convenient solution to these common complaints is good for your own schedule and your peace of mind.

*Note: LifeStyle is currently pending US Federal Aviation Administration (FAA) approval, and would then be the only oxygen concentrator allowed for use on board commercial aircraft for domestic flights. AirSep's AirLife, approved by the FAA in 1997 for B747 and B767 aircraft, and used by airlines in overseas markets, set the world standard for commercial use by in-flight supplemental oxygen passengers.

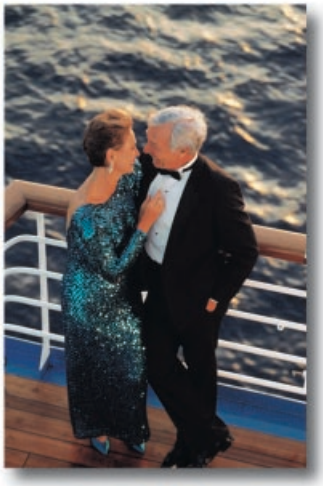
For Some, a Luxury; For Others, a Modern Medical Convenience

At this point in your life, luxury, convenience, and maximum mobility may further enrich the quantity and quality of the time you and your loved ones are able to spend away from home. Whether it's simply a trip to the beauty salon, an extended holiday or vacation, such as a special anniversary cruise, or the travel back and forth to a second home, LifeStyle can fit right in with all your journeys.

For the Working Patient

For those who wish to maintain a regular work schedule away from home despite the need for supplemental oxygen, LifeStyle may again serve as the perfect choice. Drive back and forth to work with LifeStyle connected to your automobile's standard 12-volt DC connection, use the unit's internal battery when leaving the car, or going between offices and other buildings, and then connect into any standard AC electrical outlet nearby.

The AC or DC power automatically recharges the internal battery while the unit remains operational, or you can replace a depleted battery with a fully charged one and be off on your way again.



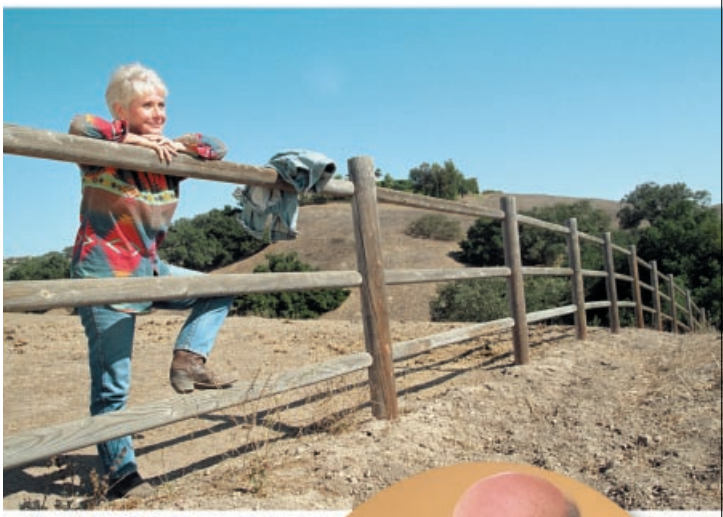
The beauty of LifeStyle is that wherever, whenever you go – you're never away from a power source and its endless supply. LifeStyle continues to make your oxygen contents, delivering just the amount of supplemental oxygen your prescription requires, as you need it.

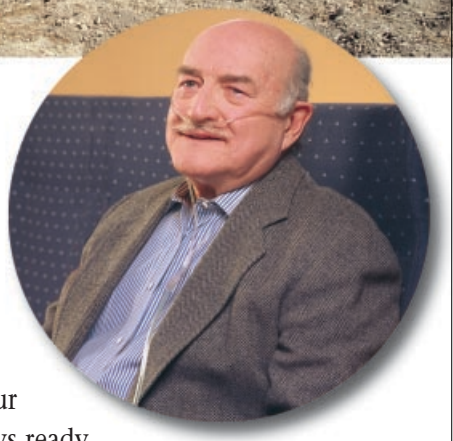
Low Power Consumption

At just 42 watts, LifeStyle's low power consumption is an added plus, for home or clinical use, as it draws less power than an average light bulb, and merely a fraction of the power consumed by the average full-size concentrator.

Use in Clinical Settings

For those in nursing homes, assisted living, or other institutional settings, LifeStyle is, again, the perfect accompaniment. Stroll the grounds, move through the dining halls or recreational centers, alone or with family and friends, and





discover the true freedom of LifeStyle. Even a trip away is now made easier. Without hesitation, you know that you and your oxygen are always ready to go -- off to greet the adventures of a new day.

Works Well for Remote Areas

If you're one of the hundreds of thousands of supplemental oxygen users residing in remote areas, or are not able to receive deliveries from an equipment provider frequently, this LifeStyle choice becomes extremely valuable. Don't feel rationed or go without oxygen if you have been prescribed for it. Proper oxygen levels are a necessity for maintaining your current health and well being and may extend your life expectancy, particularly in conjunction with daily ambulation. LifeStyle ensures you are free to ambulate as often and as long as you feel you can.

At Rest or At Play

Your physician and equipment provider will determine if LifeStyle is suitable for your specific oxygen condition. And, as with any conserving device, AirSep recommends the periodic use of pulse oximetry to determine the appropriate setting(s) that ensure the proper oxygen saturation levels for individuals at rest, during exertion, or even during sleep, in accordance with health care professionals' guidelines.

LifeStyle's apnea-like alarm helps determine when you, if a shallow or mouth- breather, are not properly receiving oxygen flow from the unit, or if the cannula becomes disconnected inadvertently. For certain patients, it may even be desirable to wear a chin strap during sleep.

How Do I Pay for LifeStyle?

LifeStyle is exclusively marketed through authorized oxygen equipment providers; therefore, your provider may offer a variety of programs for the purchase, or short- or long-term rental of this product. Depending on your insurance policy and coverage, there may also be full or partial reimbursement for LifeStyle. Discuss with your physician, equipment provider, and insurance company today the possibility of using the LifeStyle Portable Oxygen Concentrator to ensure a whole new lifestyle tomorrow.

Picture the future with AirSep's LifeStyle and you at the center of it. Start today to plan your future. Dreams do become reality when you reach for new ways to access your lifestyle choices.

Don't delay!

Contact your equipment provider to find out how you can purchase or rent LifeStyle for you or a loved one's oxygen needs.
